COMPANY PROFILE

Established in 2014 in Shamli, Uttar Pradesh, Packwell Thermoformers Pvt. Ltd. is a trusted name in the plastic moulding industry. We specialize in the manufacturing of inverter battery containers, lids, plastic buckets, and pail containers—designed to meet the demanding needs of automotive, solar, and industrial applications.

Founded by Mr. Puneet Garg and Mr. Pankaj Aggarwal, the company has grown steadily with a vision to deliver innovative, durable, and customer-centric solutions.

Our reputation is built on a strong foundation of quality, innovation, and customer satisfaction. Each product we manufacture is developed with precision and undergoes rigorous quality checks at our in-house facility to ensure durability and performance. Known for our practical and customizable designs, we deliver reliable and cost-effective solutions to clients across India. With a dedicated team of experts and a commitment to excellence, Packwell Thermoformers continues to lead the way in plastic moulded product innovation.

Founder's Message

Over the years, we have grown steadily, not just in scale, but also in our commitment to quality and trust. Every product we design reflects our belief in precision, practicality, and performance.

From inverter battery containers to customized plastic products, our focus has always been to deliver value to our clients and strengthen long-term partnerships. With constant innovation and a customer-first approach, we aim to expand our footprint in both domestic and international markets.

We believe that success lies in continuous improvement, and with the support of our talented team, we are confident of achieving new milestones in the years ahead.

Mr. Puneet Garg & Mr. Pankaj Aggarwal

OUR VISION

To be a leading innovator in plastic moulded products—offering customized solutions across industries. From containers, buckets, and pails to air Automotive Parts and specialized moulded components, we aim to deliver world-class quality products that are durable, practical, and export-ready.

Our vision is to make Packwell Thermoformers the most reliable partner for all plastic moulding requirements—by continuously expanding into new product segments, embracing technology, and ensuring customer satisfaction at every step.
